

Specialist Driving Instructors in Victoria

Specialist driving instructors work closely with clients of all abilities and Occupational Therapists.

These instructors are trained to complete both assessments and training/rehabilitation for clients with a range of different impairments that might impact on driving. A range of modifications can be offered to assist clients to learn to drive. Some of the modifications include hand operated controls, specialised mirrors and multifunction spinner knobs.

All the people listed below are licensed instructors. However, Aussie Hands is not able to provide any endorsement but welcomes feedback from members on their experience.

The list was supplied to Aussie Hands by Janene Strahan who presented at the Aussie Hands *Learning to Drive with a Hand Difference Workshop* on 1 February 2020.
